

LU TYPE - LACE UP CABLE SOCKS

KEY FEATURES

- ✓ Available in galvanised steel or stainless steel
- ✓ Suitable for underground installations
- ✓ Suitable for restricted cable access

Ideal for pulling light to medium loads; the L-type is fitted to the cable being pulled by stitching it together, like a football. Mainly used where a 'typical' cable sock can't be fitted over a connector at the end of a cable. For use in pulling when the end is not accessible. The L Type is wrapped around the cable, then closed with the wire lace provided. See 'Grip Installation Instructions' under 'Resources' tab.

Dimensions

The figures shown are indicative only. Fully dimensioned data-sheets are available on request. Nominal figures/actuals are as per data-sheet with tolerances of +/- 10%. Please contact us if you have any questions.

Range dimension overlaps If the cable, rope or hose you have lies where ranges overlap, e.g. 1" when sizing is 0.5-1.00 and 1.00-1.5 we recommend that you select your cable grip to achieve break load first. If tensile strengths are equal or both adequate, choose the smaller of the two. Please contact us if you have any questions.
