CABLE INSTALLATION, LAYING AND SUPPORT PRODUCTS FOR SUB-SEA APPLICATIONS

Slingco is an award-winning company specialising in the design and production of cable pulling and support socks, swivels, cable protectors, wire rope assemblies and accessories.

We offer world-leading products, including ranges designed and developed specifically to meet the demanding performance requirements of sub-sea and marine environments, serving both Oil & Gas and Renewable Energy industries.

MARINE CABLE SOCKS

- Galvanised steel
- Extremely heavy duty
- Suitable for large diameter underwater cable installation
- Single eye, double eye and double eye lace closing, from 4 inches to over 20 inches

LACE-UP CABLE SOCKS

- For use in pulling when cable end is not accessible
- Fitted to the cable then closed with the wire lace provided
- Ideal for pulling light to medium loads

NON-METALLIC (ARAMID) SOCKS

- Non-metallic alternative to steel
- Ideal for offshore use
- High-strength, non-metallic aramid fibre with UV protective coating
- Suitable for pulling both single cable and cable bundles
