# CUSTOM AND OFF-THE-SHELF CABLE PROTECTORS FOR YOUR DOWNHOLE APPLICATION

Its design and innovative engineering deliver the required grip without risk of either compression-induced damage to cables, or damage to the protector itself, enabling it to be re-used (subject to all necessary safety checks).

## MID-JOINT CABLE PROTECTORS

The Mid-Joint Cable Protector is installed between joints of downhole tubing strings, and is often used in conjunction with other cable protectors to further secure and protect cables or lines from damage.

## CENTRALISING CABLE PROTECTORS

This versatile 'hybrid' product is designed to fulfill the dual role of cable protection and centralization. Built in collar blades provide offset guidance for the tubing while protecting cabling at the coupling. As with the other protectors in our line up Centralizing Cable Protectors are available in standard and custom configurations.

## BANDED CABLE PROTECTORS

These lightweight, stamped steel protective cable guards offer a low-cost alternative to our standard cable protectors. Designed for use in shallow wells with little to no deviation, the cable guards are situated across the coupling and attached to the tubing with steel bands.

This offers protection of cables crossing the coupling that is far superior to banding alone.

## CUSTOM DESIGN AND RAPID PROTOTYPING

Our Cable Protectors are trusted the world over and we manufacture models for just about any application, including artificial lift, ESP, control cables, gauges, fiber optics and valves.

But sometimes, you need something special, a particular solution to a particular downhole challenge, and we can help here too. Our Rapid Prototyping Division means we can offer 24 hour 3D design turnaround. And our team can provide working prototypes - FAST!

The success of your business is built on delivering a rapid response, and ours is just the same. That's why we've invested heavily in our ability to bring you more choice, faster supply and custom solutions.

Any size, any shape, any quantity – we're passionate about providing the solutions you need for your downhole applications, and that's why we offer:

- Choice – a wide range of cable protectors from stock
- Fast supply – excellent inventory
- Custom solutions – rapid 3D design and sample prototyping

Here are just some of the cable protector products we offer:

## STANDARD CABLE PROTECTORS

The Slingco Cable Protector has been purpose-designed for use on the wide range of cables, lines and umbilicals that have to be conveyed in and out of well-bores. Its innovative, streamlined form minimises the risk of downhole hang-ups to ensure maximum operational productivity.

Each protector features an eight-point friction pad gripping system that provides a secure, reliable grip to enable the safe, quick and effective conveying and securing of ESP cables, control lines, umbilicals and encapsulated bundles.
